CBP ENERGY SERVICES

Company History

- ▶ C.B.P. in Washington, PA, was founded in 1970 as a spin off from our then English parent company, Greenbank Group, to cover the North American market place. Greenbank started business in 1954 and serviced the European and other world markets. We now operate worldwide, servicing multiple energy markets with construction management, construction services, engineering services, and product services.

CBP ENERGY SERVICES

Commitment to Safety

- ▶ In all of its work, CBP is committed to a high standard of quality and safety, as well as to the protection of the environment through strict adherence to regulatory requirements.
- ▶ CBP's consideration of safety as a top priority is reflected by its premier on-the-job safety record, and in its low workers' compensation experience modification rating. CBP has on staff a full-time Safety Director, who administers all aspects of the firm's safety program from initial and re-certification safety related training for the employees to the comprehensive corporate Safety Manual. The safety manual defines the company's policies and describes safety-related specifications for topics from personal protective equipment to HAZPOWER, hazard recognition/communication and emergency action planning.
- ▶ Recognizing the importance of environmental stewardship, CBP incorporates sound environmental management practices into both its day to day business and project specific activities. When initiating construction or maintenance projects, CBP personnel also coordinate closely with clients to identify and assure conformance to site specific environmental requirements and to train field personnel in project-particular environmental permit conditions.

CBP ENERGY SERVICES

Pipeline Construction Services

- ▶ CBP has the depth and breadth of expertise to provide a wide range of services to the energy and industrial sectors. The company has the full time capabilities to act as the prime contractor for multi-faceted projects, as well as the flexibility to provide specialty subcontracting services as part of larger client teams.
- ▶ Mainline pipeline construction (all phases - clearing through ROW restoration)
- ▶ Gathering systems construction
- ▶ Pipeline maintenance and repair (integrity testing, dig ups, sleeving, stoppeling and coating)
- ▶ Hydrostatic testing
- ▶ Turn key boring and HDD services

CBP ENERGY SERVICES
